**Athens International Airport's aircraft movements for the year 2010 amounted to 191.8 thousands, 8.7% below the corresponding 2009 levels. On top of the international economic crisis, the extremely difficult financial and economic situation in Greece, the tremendous upheaval caused to the European air transport sector by natural phenomena and harsh weather conditions, the significant consolidation of services of the Greek carriers has led to major capacity cuts in the Greek aviation market, thus creating, apart from the already existing demand-driven traffic decline, a supply-driven traffic downturn. As a result, domestic operations experienced a decline of 11.4%, amounting to 92.5 thousand, while international flights presented smaller losses at the level of 6.1%, being at the level of 99.3 thousands.**
